IMS Releases New Four-Way Resistive Power Splitter to 7GHz

Portsmouth, Rhode Island, USA – International Manufacturing Services, Inc. (IMS), a leading manufacturer of thick film resistors, attenuators, terminations, planar dividers, planar filters and thermal management devices is pleased to announce the release of their 3W four-way resistive power splitter. The IPS2522 is surface mountable and is suitable for RF and Microwave applications to 7GHz. These devices are designed for solder or epoxy implementation 50ohm impedance environments. The IMS four-way resistive splitters have 12dB attenuation each output with ± 0.7 dB amplitude balance and a nominal VSWR of 1.3:1 max. Samples of the IPS2522 four-way resistive power splitters can be obtained by visiting www.ims-resistors.com or contacting the factory.

Since 1974, IMS has been supplying the electronics manufacturing industries with highest quality thick and thin film chip resistors, terminations, attenuators, thermal management devices and RF components. For more information, visit www.ims-resistors.com, or contact the company at 50 Schoolhouse Lane, Portsmouth, RI, 02871 USA, Tel. 401-683-9700. Fax 401-683-5571, e-mail: sales@ims-resistors.com.
