IMS Introduces New B-Series Therma-Bridge, Thermal Management Device

Portsmouth, Rhode Island, USA – International Manufacturing Services, Inc. (IMS) introduces the B-Series Therma-Bridge as a simple and cost effective thermal management device. The B-Series Therma-Bridge uses a thermally conductive Aluminum Nitride chip with metalized terminals to transport heat from one location to another, thus enhancing overall board performance. IMS makes the Therma-Bridge in numerous sizes and thickness, allowing users to choose the part which best fits their heat management needs. Information and specifications regarding the thermal conductivity of each B-Series case/thickness combination and ordering information can be found on the IMS web site, <http://www.ims-resistors.com/>.

Since 1974, IMS has been supplying the electronics manufacturing industries with highest quality thick and thin film chip resistors, terminations, filters and attenuators. For more information, visit www.ims-resistors.com, or contact the company at 50 Schoolhouse Lane, Portsmouth, RI, 02871 USA, Tel. 401-683-9700. Fax 401-683-5571, e-mail: sales@ims-resistors.com.
